Marathon County – July 12-14, 2011 • Outagamie County – July 17-19, 2012 • Barron County – July 9-11, 2013

## 2011 Field Demonstrations

Sixteen exhibitors are planning to participate in field demonstrations during the 2011 Wisconsin Farm Technology Days show in Marathon County July 12-14. The focus of the demonstrations will be forage harvesting. For the mower conditioning demonstrations, ten machines are expected ranging in cutting width from 13 to 30 feet. Seven forage harvesters are scheduled to harvest alfalfa silage, three are pull type machines. Windrow mergers are becoming more popular with six planned for field demonstrations. Four balers are planned for demonstrations-dry hay and baleage. Other machines you will see demonstrated in the field are rakes, forage boxes on trucks and wagons, and bale handling equipment. Four exhibitors plan to participate in the Ride and Drive; some equipment will have guidance systems for improved productivity. Check the Official Program at [www.wifarmtechnologydays.com](http://www.wifarmtechnologydays.com) for more details such as demonstration times.
