Tent Information – Please read completely.

Tents are flame retardant vinyl and include all necessary materials and labor; sidewall is also included. Please call us if you need other tent sizes. If you need your tent or equipment by a specific date before the show start date, please contact us to see if additional fees will occur based on the required set-up date.

You must provide complete dimensions of the lot and exactly where you want the tent in feet from the North, South, East and West. Incorrect or not completed information will result in either your tent not being set up or an additional charge if your tent must be moved. Please note when placing the order for your tent that tents are staked out an additional 5ft on each side for a tent that is 7ft tall, and 7ft for a tent that is 9ft tall. You must give consideration for this additional staking as tent cannot be staked any shorter or outside the boundary of the space you rented.

All exhibitors must have portable fire-extinguishing equipment in their tent. Equipment is to be up to date in servicing and posted with easy access in the tent. Liquefied petroleum gasses should be in approved containers and be not less than 60 inches from any tent and shall be in accordance with the provisions of NFPA 58. Each tent shall be kept free of flammable and combustible materials during show hours. No smoking shall be permitted in any tent. Local fire inspector shall use authority at their discretion of authority to ask for corrections or modifications to meet these requirements.
